

I have just discovered that Sinclair Broadcasting is forcing their stations to air an anti-Kerry documentary days before the election. In the interest of fair and responsible broadcasting which serves the public interest, Sinclair should be prohibited from this action or should be mandated to provide equal time for opposing views.

As the government office responsible for controlling our public airwaves, I ask that you look into this matter and take it into serious consideration when it is time for Sinclair's license renewal.

It is a very slippery slope between "entertainment" and corporate/government manipulation of free elections.

Thank you.
